Aplastic Anemia is an autoimmune disease that occurs when the bone marrow stops producing enough blood cells. It affects about 4 in every 1 million people.

Nicole Mendlik was diagnosed with this disease in October 2011 and is asking for your help. We are having a benefit to help Nicole's family and also to support the National Marrow Donor Program, the Dan Jansen Foundation, and the hospitalized kids at Children's Hospital in Milwaukee.

You can follow Nicole's progress at:

**Bone marrow donor registry and blood drive will be running throughout the event.** Please consider joining the National Marrow Donor Program, not only for Nicole but also for the thousands of other people in need. Nicole does not require a transplant at this time but may need one in the future, and she currently does not have a match. All that's required to sign up is a short questionnaire and cheek swab. Please visit [BeTheMatch.org](http://BeTheMatch.org) for more information.
